

November 24, 1958

Dear Red:

We would like your permission to purchase a digital recorder similar to the Hewlett Packard Model 560A. It would be used primarily to perform checks on:

- (a) Secondary Programmer oscillator accuracy
- (b) Time totalizer accuracy
- (c) Dynamic measurements of the camera

The unit will be used in (a) above to graphically check each of the 99 available frequency outputs and to check oscillation drifts over an extended period of time. On item (b) above, we will check out the long term stability data. The dynamic measurement for (c) above will include scan rate and the v/h configuration. We are requesting the Hewlett Packard 560A as it may be used in conjunction with our existing Hewlett Packard 523 and 524 series electronic counters without modification or adaptation. Approximate cost on this unit is

25X1

Will you please call me and give me your decision for this equipment. I am sending a copy of this letter to and will notify him as to your decision.

25X1

Very truly yours,

25X1

JBL:clm

cc: Dan K.

When I hear from on this Hewlett Packard 560A, I will give you a call and notify you of his decision. In the meantime, I would appreciate it if you would check and see if you could provide this for us so that when I have Red's decision, we will be in a position to go ahead.
